

# **Full-Stack Developer - Job Description**

## **About Us:**

GRIN is an award-winning early stage start-up. It's mission is to reduce the cost and complexity of dental-orthodontist care. And it is doing so with disruptive technology as well as first-of-it's-kind market approach. Grin is building a multi-sided platform that gives users a radically convenient customer journey, and empowers doctors to deliver patient centric, responsible care for all types of smiles.

## **Main Responsibilities:**

- Design and implement client-side and server-side architecture.
- Build cloud based apps and services with an emphasis on scalability and performance.
- Create, improve and upgrade deployment processes and methodologies.
- Review other team members code.
- Write technical documentation.

## **Requirements**

- 4+ years of experience in software development.
- Bs.c Degree in computer science/computer engineering or "Mamram/8200" graduate.
- Experience in Javascript, NodeJS, ReactJS, React Native,
- Advantage: AWS/Google cloud/Other cloud based platforms.
- Familiarity with databases (relational/non relational databases).
- Devops skills (CI/CD, testing frameworks).
- Advantage: mobile native experience (iOS&Android, swift/objective-c, java).
  
- Autodidact, self-starter with strong communication skills.
- Can-do attitude, self-driven, flexible, intellectually curious, willingness to learn new skills and take on new challenges to meet business goals.
- Ability to work independently as well as in a team.
- Good English language communication skills.
