

QA - Job description

About Us:

GRIN is an award-winning early stage start-up. It's mission is to reduce the cost and complexity of dental-orthodontist care. And it is doing so with disruptive technology as well as first-of-it's-kind market approach. Grin is building a multi-sided platform that gives users a radically convenient customer journey, and empowers doctors to deliver patient centric, responsible care for all types of smiles.

Main Responsibilities:

- Develop test cases, scripts and reports of both web and mobile applications
- Validate and test a wide variety of technologies and platforms (iOS, Android, web, cloud etc)
- Running regression and sanity tests in relatively short timelines
- Verify that real-world use cases and user expectations are simulated and met during the validation process
- Be our strongest user-advocate, and the guardian of our outstanding customer experience

Requirements

- Experienced QA engineer with at least 2 years of experience
- Able to create test plans, define testing strategies, and get a kick out of uncovering these hard-to-find bugs
- Abstract thinker – to ensure ability to not conform to the norm. Norms do not find bugs quickly
- Excellent communicator and able to work collaboratively with other departments
- Fast learner with the ability to work independently
- Passionate about technology
- Capable of being focused and keep up under pressure
- Experienced with mobile applications
- Advantage: Familiarity with dev tools and experience running applications locally
- Advantage: Experience with Git, Databases, Ticket management softwares
- Advantage: Script/Code writing skills
